About the Role: Customer Service and IT Support

Location: Berrinba, Queensland

You will play a vital role as the first point of contact for our customers, delivering outstanding service and support. Reporting directly to the Head of ICT, you'll be the friendly, reliable voice customers turn to when something isn't working: troubleshooting hardware and software issues, handling maintenance tasks, and making sure every interaction leaves a positive impression.

Key Duties & Responsibilities:

- Provide Level 1 and 2 support to clients across the Asia Pacific region.
- Monitor and manage incoming Service Desk tickets.
- Communicate with customers via our online Service Desk, phone, and email.
- Escalate issues to senior team members when necessary.
- Assist with warranty returns and shipping.
- Deliver both on-site and remote product and technical support to customers.
- Build and maintain strong, lasting customer relationships.
- Contribute to ongoing projects and routine business requirements.
- Create and maintain in-house management and monitoring systems.

What We Offer:

Join a small, friendly, and supportive team with a culture built on customer support excellence, knowledge sharing, and on-the-job training. This role offers a unique opportunity to gain hands-on exposure to cutting-edge hardware and software technologies, and to contribute to the development and testing of technologies designed in-house, including our management, monitoring, and customer-facing software.

Knowledge, Skills & Abilities:

- A genuine passion for customer service, with a friendly, patient, and helpful approach.
- Exceptional verbal and written communication skills, with the ability to explain complex technical concepts clearly to non-technical customers.
- Skilled at translating technical details into practical, customer-friendly solutions that build strong client relationships.
- Strong problem-solving and troubleshooting abilities, with a detail-oriented approach.
- Working knowledge of Linux systems and basic networking.
- A quick learner who adapts easily to new tools, systems, and technologies as the role evolves.
- Ability to work effectively both independently and as part of a team.
- Self-motivated, proactive, and eager to continuously learn and develop professionally.
- Strong time management skills, with the ability to prioritize and manage multiple tasks efficiently.
- Valid driver's license and access to reliable transportation.

Technical Proficiency (Highly Regarded):

Prior exposure to any of the following is highly regarded, but not essential. We're happy to help you build these skills on the job, provided you're keen to learn:

- Node.js, React, TypeScript, JavaScript
- SQL (MariaDB and PostgreSQL)
- Go
- Kafka
- Grafana

Applicants must have full Australian permanent work rights, with no restrictions, to be considered for this role.

Employer questions

Your application will include the following questions:

- Which of the following statements best describes your right to work in Australia?
- What's your expected annual base salary?
- How many years' experience do you have in a Customer Service Role?
- How much notice are you required to give your current employer?
- Do you have professional experience troubleshooting and repairing hardware issues on PC and laptop?
- Which of the following Linux distributions are you familiar with?
- Do you have a current Australian driver's licence?
- Do you own or have regular access to a car?

Be careful

Don’t provide your bank or credit card details when applying for jobs.
